

What's new in ALP 5.0.0 rev 5382 (since ALP 3.8)

New Features

- Cross-platform: identical color management results on Mac OS X and Windows platforms.
- New Alwan Multicolor engine: Higher color accuracy, higher ink savings.
- New Dot Reproduction Limit option: Customize plates for specific processes such as Flexo.
- New RGB and Gray input color spaces.
- New Load / Save Settings functionality.
- New "Kout greater or equal to Kin" option: output Black will be greater or equal to input Black (option available with GCR or Maximum Black, when input and output CMYK colorspace are identical)

Dongles

Only Black dongles, with a valid URTS (Update and Remote Technical Support Program) are supported. Old Purple dongles must be upgraded to run ALP v5.

For more details please contact sales@alwancolor.com.

Note: ALP cannot be run in demo mode using time-limited license codes for more than 3 months. After 3 months, it will not be possible anymore to enter any time-limited license to activate the software.
