

Create high-end ICC printer profiles for any color space

CoPrA is the control center for any profiling task. Create high quality ICC Printer, DeviceLink and SaveInk profiles for any color space, ensuring accuracy, consistency, and efficiency across workflows.

Learn more!

Why choose CoPrA?

- Achieve unmatched color precision with ICC and DeviceLink profiles
- Optimize measurement data for reliable profiles and fewer reprints
- Intuitive interface for experts and newcomers
- Unlock extended gamut printing with seamless multicolor profiles
- SaveInk profiles reduce costs without quality loss
- Seamless integration with ColorAnt and ZePrA

No Limits, Full Compatibility

CoPrA's ICC profiles are non-proprietary and work with any system, giving you freedom to manage color without restrictions or vendor lock-in.

Printer Profiles

Deliver consistent quality across Gray, RGB, CMY, CMYK, and multicolor printing.

Update Profiles

Stay flexible by updating profiles instantly to match changing press conditions.

DeviceLink Profiles

Guarantee reliable conversions with DeviceLink profiles for any color space.

Ink Saving

Cut costs with SaveInk profiles, including multicolor, without losing quality.

Visual DeviceLink Editing

See results before you print. Edit, preview, and fine-tune DeviceLinks visually.

Profile Management

Take control of ICC profiles with simple tools for storage, editing, and optimization.

Multicolor Profiles

Handle complex jobs with advanced multicolor profiles for extended gamut printing.

G7® Certification

Achieve recognized industry standards for precision and color consistency.

CoPrA Features		Description / Benefits	M	L	XL	XXL
Image conversion						
RGB, CMYK, CMY, Gray	Create precise profiles for all standard color spaces	✓	✓	✓	✓	✓
Multicolor	Enable complex multicolor and extended gamut printing processes	✓	✓	✓	✓	✓
DeviceLink profile creation by editing						
RGB, CMYK, CMY, Gray, LAB	Support all major color spaces for advanced DeviceLink editing		✓	✓	✓	✓
Multicolor	Create and adjust multicolor DeviceLinks for advanced workflows					✓
DeviceLink profile creation from ICC profiles						
RGB, CMYK, CMY, Gray, LAB	Support all major color spaces for advanced DeviceLink editing		✓	✓	✓	✓
SaveInk CMYK	Reduce ink usage on CMYK jobs without losing quality			✓	✓	✓
SaveInk Multicolor	Optimize ink usage for multicolor prints without quality loss					✓
Multicolor	Create DeviceLinks for multicolor and extended gamut printing					✓
Update DeviceLinks (RGB, CMYK)	Adjust DeviceLinks to match changing print conditions accurately		✓	✓	✓	✓
Update Multicolor DeviceLinks	Keep multicolor DeviceLinks current for complex print jobs					✓
DeviceLink Recalculating	Recalculate DeviceLinks to maintain optimal color conversions		✓	✓	✓	✓
DeviceLink Linearization	Create DeviceLink Linearizations to improve gradients and tone reproduction		✓	✓	✓	✓
DeviceLink Iteration	Refine DeviceLinks iteratively for maximum color accuracy		✓	✓	✓	✓
Printer profile creation						
Gray, RGB, CMYK with presets only	Quickly generate standard profiles using built-in presets	✓	✓	✓	✓	✓
RGB, CMYK, CMY, Gray	Support all standard printer color spaces precisely	✓	✓	✓	✓	✓
Multicolor	Create advanced printer profiles for complex multicolor workflows					✓
Update profiles (RGB, CMYK) with presets only	Refresh RGB and CMYK profiles quickly using presets	✓	✓	✓	✓	✓
Update profiles (RGB, CMYK)	Update existing profiles to reflect new press conditions	✓	✓	✓	✓	✓
Update Multicolor profiles	Keep multicolor profiles up to date for accurate printing					✓
ProfileManager						
Profile Report as PDF	Generate readable PDF reports for profile verification	✓	✓	✓	✓	✓
Profile Report as XML	Export profile data in XML for workflow integration		✓	✓	✓	✓
Update Profile Report	Create or update profile module for quality control	✓	✓	✓	✓	✓
Bonus Software	ColorAnt	Analyze and optimize color data to create more accurate CoPrA profiles	ColorAnt M	ColorAnt M	ColorAnt M	ColorAnt L
Add-on ZePrA for a Complete Solution		Automate color conversions and streamline workflows from CoPrA profiles		ZePrA Process	ZePrA Process	ZePrA Multicolor

Unlock the full potential of CoPrA

CoPrA delivers immediate results whether used on its own, integrated into an existing workflow, or combined with the ColorLogic Suite for a complete color management solution
