

Review 2541

Release notes

New features and improvements

New features:

- Added a side info panel in Review Admin for both folders and individual files.
- Introduced a transaction history overview in Review Admin, allowing filtering of Enfocus Cloud transactions by day, month, or year.
- Admins can now delete individual files within a Job Collection.

Bug fixes:

This release includes stability improvements and bug fixes.

- **JP-35905:** Fixed an issue where some complex compound clipping paths were not correctly executed when opening in the viewer.
- **GC-643:** Aligned the rendering of opaque elements in PDFs with ink tables and print order to provide a consistent viewing experience matching Adobe Acrobat.
- **ENFC-19367:** Improved Review Admin performance when new Review items are added.
- **ENFC-18588:** Enhanced Review Admin behavior when new Review items are added with filters enabled in the overview.
- **ENFC-18700:** Fixed an issue where the webpage temporarily displayed the title "Enfocus" before loading the correct themed title.
- **ENFC-19646:** Fixed an issue where a manual refresh was required after deleting items in Review Admin.
- **ENFC-19756:** Improved performance in the Review Admin overview when making approval decisions.
- **ENFC-20017:** Fixed a UI issue in the viewer where dividers were missing between tool panels.
