

# Default Elements 2523

Release notes

## New features and improvements

This release will introduce a range of new features and improvements, including:

### Webhook (v8.3):

Bug fixes:

- **ENFSWAPP-3476, ENFSWAPP-3875:** Temporary Folder Cleanup  
The error message "Error: ENOTEMPTY: directory not empty" was caused by temporary folders not being cleaned up properly. This issue has now been fixed by correcting the cleanup process.
- **ENFSWAPP-2642, ENFSWAPP-2794:** Switch Restart  
The issue of the webhook failing to send a response or the script not being decrypted was resolved by cleaning up the application data (*Switch menu > File > Cleanup Application Data*) and restarting Switch.

### IMPORTANT

It is recommended to restart Switch if you encounter issues such as the webhook failing to send a response or the script not being decrypted properly. To resolve these issues, perform a cleanup by navigating to *Switch menu > File > Cleanup Application Data*, and then restart Switch. This process can help restore normal operation.
