# ENFOCUS SWITCH
HP INDIGO SMARTSTREAM INTEGRATION

MORE **POWER** TO YOU

SMART AUTOMATION WITH ENFOCUS SWITCH

Automate repetitive tasks and reduce the number of touch points associated with receiving, sorting and processing files. Integrate seamlessly with third-party applications to eliminate errors and increase throughput.

enfocus SWITCH + *hp*

The power to automate and streamline digital print production processes

WITH SWITCH YOU CAN:

- Sort and collate separate jobs and batch them into a single print job.

- Automate Variable Data Print jobs and impose jobs through integration with the HP SmartStream Designer for Adobe InDesign in both Mac and Windows versions.

- Configure the HP Indigo digital press by passing along job parameters such as the number of print copies, print priority, stacker destination and separation mode.

- Create and insert customized banner sheets at the beginning of each job to assist in finishing, tracking and fulfillment.

- And much more...

ENFOCUS SWITCH
HP INDIGO SMARTSTREAM INTEGRATION

Streamline digital print production processes

Receive, sort, route, convert native application files into PDF, quality check and correct PDF files to ensure digital print production compliance.

Automate variable data print jobs

Automate the launch and set up of SmartStream Designer depending on the VDP job type. CSV files can be created on the fly and are automatically linked with the appropriate template file.

Automate imposition and digital press utilisation

Automatically impose PDF files based on number of pages and page size and route the print-ready files to the appropriate (load balanced) digital press with settings such as media, number of copies, print priority, etc.
