Why choose ZePrA?

- Automated color conversion for fast, error-free output
- Expand into multicolor and ECG printing instantly with no extra tools needed.
- SmartLink builds optimal DeviceLinks automatically
- Integrates with PDF workflows and automation tools
- Spectral spot matching for accurate brand colors
- Saves on ink costs
- Modular licensing—add features as you grow
- Seamless integration with ColorAnt and CoPrA

ColorLogic's Best New Feature: Flows

Flows transforms ZePrA into a powerful automation hub, letting you build smart, repeatable workflows that cut manual steps, boost accuracy, and deliver perfect color results.

Wizard-driven interface

Create workflows with the Auto Setup Wizard to automate color management tasks quickly.

Automate color conversions

Avoid tedious and error-prone manual color conversions and let ZePrA convert all your files quickly and reliably.

Advanced spot color conversion

State-of-the-art spectral color prediction technology that iterates spot colors for more accurate conversions.

Ink saving and TAC reduction

Create SaveInk and TAC reduction workflows with a few short clicks.

Transparency flattening

Flattens transparency during PDF processing to ensure smooth color conversions and reliable output for complex files.

Comprehensive reporting

Generate detailed reports on spot conversions, ink savings, and DeviceLink processes in multiple formats for easy review.

Precise proofing for spot colors

Verify spot color accuracy before processing with ZePrA's reports, ensuring optimal color and reducing rework.

| ZePrA Features | Description / Benefits | Process | Multicolor | |
|-------------------------------------|--|---|-------------|------------|
| File Conversion | | | | |
| JPEG/TIFF/PSD/PSB | Processes the most frequently used image file formats | ✓ | ✓ | |
| PDF | Processes industry-standard PDF and PDF/X files for print production | ✓ | ✓ | |
| Color Space support | | | | |
| RGB, CMYK, Gray, LAB | Handles all standard color spaces to ensure consistent results across devices | ✓ | ✓ | |
| Multicolor | Supports extended gamut printing with 5–10 color separations | | ✓ | |
| Advanced Spot Color Conversion | Converts spot colors to press optimized process inks with high precision | ✓ | ✓ | |
| Spot Color Iteration Wizard | Iteratively improves spot color matching with measurement-based corrections | ✓ | ✓ | |
| PantoneLIVE® Support | Fast artwork placement between PACKZ and iC3D | ✓ | ✓ | |
| SmartLink for RGB, Gray, CMYK | Enables SmartLink profile creation for standard color spaces | ✓ | ✓ | |
| SmartLink for Multicolor | Generates SmartLink profiles for multicolor workflows | | ✓ | |
| Savelink for SmartLink (CMYK) | Reduces CMYK ink usage while maintaining visual quality | | ✓ | |
| Savelink for SmartLink (Multicolor) | Applies Savelink to multicolor jobs for cost-efficient extended gamut printing | | ✓ | |
| Other Tools | | | | |
| Drive ZePrA via Command Line | Supports full automation through scripting and CLI | | ✓ | |
| Flattening | Flattens transparencies for more reliable printing | ✓ | ✓ | |
| Gradation | Applies tone curve adjustments for precision control | ✓ | ✓ | |
| Multithreading | Processes multiple jobs simultaneously to speed up production | up to 3 threads | ✓ | |
| Proofing | Simulates final print output for contract proofing | ✓ | ✓ | |
| Flows | Automates job routing and processing using rule-based workflows | | ✓ | |
| Bonus Software | CoPrA (Open) | Includes CoPrA software with open profile creation for seamless integration | CoPrA L, XL | CoPrA XXL |
| | Expert DeviceLink Set | Open, editable high-end ICC profiles and ready-made DeviceLink profiles | ✓ | ✓ |
| | Push-2-ZePrA | Send Photoshop files instantly to ZePrA with 30 preset global print connections | ✓ | ✓ |
| | Add-on ColorAnt for a Complete Solution | Analyze and optimize color data to improve ZePrA color conversions | ColorAnt M | ColorAnt L |

Unlock the full potential of ZePrA

ZePrA delivers immediate results whether used on its own, integrated into an existing workflow, or combined with the ColorLogic Suite for a complete color management solution
